

Thermax[®] TDI

Instructions for Use

Product Description: Thermal Disinfection Indicator - TDI

Standard Range: 65-82°C / 149-180°F

Directions: Peel label from backing paper

Apply to a clean, dry surface – ideally a plate or stainless steel surface in the middle of the dishwasher rack. Ensure the entire indicator is in contact with the surface. Run the dishwasher.

A colour change from silver white / to black indicates that the rating has been reached.

Remove the indicator whilst the surface is still warm and attach to dishwasher documentation

Storage: Store in a cool dry place below 18°C (64°F)
